# MaXrev BI

Limitless Analytics • Dashboards • Dynamic Reports • Notifications & Alerts

## Analyses

With just a few clicks, users can create and navigate intuitively in the most advanced analyses. All objects in an analysis are dynamically interrelated, and with a single click on a dimension in an object, this dimension will be adapted as a criterion to other objects in the analysis. In addition, detailed explanations are added.

## Reports

All types of reports can be created in no time. You can also freely distribute reports across language barriers and physical boundaries, for example via email or websites.

## Intelligent Dashboards

Dashboards and scorecards provide an overview of company performance through interactive gauges and built-in intelligence. You can quickly identify the company's biggest problems and opportunities.
